## Summary

Flutter Developer with 1 year of professional experience delivering production-ready mobile applications for local and international clients. Specialized in building full-stack solutions from concept to deployment, integrating Firebase, Supabase, and custom REST APIs. Strong focus on clean architecture, performance optimization, and creating scalable cross-platform applications.

## Technical Skills

**Mobile Development:** Flutter, Dart, State Management (Provider, Riverpod), Responsive UI/UX Design  
**Backend & Database:** Firebase (Auth, Firestore, FCM, Storage), Supabase, PHP, MySQL, SQLite, REST APIs  
**Tools & Practices:** Git/GitHub, Agile Methodology, Clean Architecture, MVVM Pattern, API Integration  
**Additional:** Google Maps SDK, Stripe, Real-time Data Sync, Offline-First Architecture

## Professional Experience

**Flutter Developer**  
*DragSense*

Mar 2025 – Aug 2025  
*Islamabad, Pakistan*

- Developed location-based mobile applications integrating Google Maps SDK and Supabase for real-time geolocation tracking and data synchronization.
- Optimized app performance reducing initial load time by 40% through lazy loading, efficient widget rendering, and improved state management.
- Collaborated in Agile sprints with cross-functional teams, consistently delivering features on schedule with minimal post-release bugs.
- Implemented offline-first architecture ensuring seamless user experience in low-connectivity environments.

**Flutter Developer**  
*Acceltor Ltd*

Oct 2024 – Feb 2025  
*Islington, UK (Remote)*

- Built eCommerce mobile application using Flutter and Firebase, handling product catalog, user authentication, and order management for international client.
- Integrated REST APIs and Stripe payment gateway ensuring secure transaction processing and real-time order tracking.
- Developed reusable component library reducing development time by 35% and maintaining consistent UI/UX across the application.
- Worked closely with design and backend teams to ensure smooth API integration and optimal app performance.

**Flutter Development Intern**  
*Bytewise Ltd*

Jun 2024 – Sep 2024  
*Islamabad, Pakistan*

- Built authentication flows with Firebase supporting email/password and OAuth integration for multiple applications.
- Integrated REST APIs with proper error handling, retry logic, and response caching improving data reliability.
- Gained experience with Git version control, code reviews, and collaborative development workflows.

## Education

**Bachelor of Computer Science**  
*Air University*

2020 – 2024  
*Islamabad, Pakistan*

## Featured Projects

---

### Oval | Enterprise Communication Platform

*Flutter, Firebase*

- Architected and developed from scratch a secure internal communication platform for Japanese enterprise client for internal use.
- Implemented Firebase Cloud Messaging for real-time push notifications achieving great delivery rate across departments.
- Built role-based access control and company-authorized authentication ensuring enterprise-grade security compliance.
- Optimized message delivery reducing latency by 60% through efficient data structures and local caching strategies.

### RefreshKicks | On-Demand Shoe Care Service

*Flutter, PHP, MySQL*

- Designed and built complete full-stack mobile application from ground up with custom PHP backend and MySQL database for service-based business.
- Developed real-time order tracking system, Stripe payment integration, and automated notification system processing.
- Created comprehensive admin dashboard for order management, user administration, revenue analytics, and business reporting.

### ShopEase | Full-Featured eCommerce Platform

*Flutter, Firebase, Stripe*

- Built complete eCommerce solution with product browsing, cart management, wishlist functionality, and secure checkout flow.
- Integrated Stripe payment gateway, Firebase Auth for user management, and Firestore for real-time inventory tracking.
- Implemented advanced search and filtering, order history, and push notifications for order updates and promotional offers.

### SocialCLI | Console-Based Social Network

*Dart*

- Developed command-line social media application demonstrating core Dart programming concepts and OOP principles.
- Implemented user authentication system, post creation/management, and real-time chat functionality using file-based data persistence.
- Designed modular architecture with separate classes for user management, posts, messaging, and session handling.
