Summary

I'm a Computer Science graduate specializing in Flutter-based mobile app development, experienced across the full app lifecycle. Passionate about building unique, user-friendly, and high-performance applications.

Experience

Junior Flutter Developer (Remote) <i>DragSense</i>	March 25 – June 25 <i>Islamabad, Pakistan</i>
Junior Flutter Developer (Remote) <i>Acceltor Ltd</i>	October 24 – February 25 <i>Islington, UK</i>
Flutter Fellow <i>Bytewise Ltd</i>	June 24 – September 24 <i>Islamabad, Pakistan</i>

Education

Air University <i>Bachelor of Computer Science</i>	Islamabad, Pakistan 2025
--	-----------------------------

Skills

Programming Languages:	Dart, Python, JavaScript, HTML, CSS, C++, C#
Technologies:	Flutter, Provider, Riverpod, Firebase, SQLite, MySQL, Git/GitHub, FlutterFlow, PHP, React
Soft Skills:	Excellent communication, Strong Teamwork Abilities, Adaptability and Flexibility

Projects

<u>Oval Internal Communication Platform</u>	<i>Flutter, Firebase Cloud Messaging</i>
<ul style="list-style-type: none">Developed a secure cross-platform communication tool for employee collaboration using Flutter, featuring company-authorized login system and optimized internal messaging capabilities.Implemented Firebase Cloud Messaging for real-time push notifications delivering announcements, team updates, and critical information even when app runs in background.Built theme selection feature with light/dark mode options and ensured consistent user experience across multiple devices through responsive design implementation.	
<u>Refresh Kicks Mobile App A Shoe Refreshing Service</u>	<i>Flutter, PHP, MySQL REST APIs</i>
<ul style="list-style-type: none">Designed and developed the Refresh Kicks mobile app from concept to deployment, featuring a customer-facing application with integrated Stripe payment processing and real-time service updates.Built a complementary admin application that empowered business owners with comprehensive order management, user administration, service configuration, and business analytics capabilities.	
<u>Favourite Places App A Personal Location Bookmarking Tool</u>	<i>Flutter, Google Maps API, SQLite</i>
<ul style="list-style-type: none">Developed a mobile app that enables users to save their favorite places using Google Maps integration, allowing for easy bookmarking and navigation.Implemented features such as real-time location tracking, map previews, location-based search, and persistent storage using SQLite for offline access.Focused on responsive design and smooth UX to ensure seamless interaction across various screen sizes and devices.	

Video Games Recommendation System

Python, Scikit-learn, Machine Learning

- Developed a recommendation system using NearestNeighbors unsupervised machine learning algorithm to suggest video games based on user input of game title and platform preferences.
- Implemented distance computation algorithms to measure similarity between data points using features including genre, platform, ESRB ratings, critic scores, and user scores from comprehensive gaming datasets.

Cricklyzer | A Cricket Enthusiast App

Flutter, REST APIs

- Developed a manual ball speed measuring feature that enables users to determine ball velocity by inputting release point, impact point, and pitch dimensions, achieving 90% accuracy with proper parameter selection.
- Enhanced user experience by integrating live cricket scores and news APIs while implementing Firebase and local storage solutions for secure, personalized data management.

Chat App | Real-time Messaging Application

Flutter, Firebase

- Built a cross-platform chat application enabling users to communicate in real-time using Firebase Cloud Firestore and Firebase Authentication.
- Integrated Firebase Cloud Messaging for push notifications to alert users of new messages even when the app is in the background.
- Implemented user authentication, chat screen, message input handling, and real-time message syncing for seamless conversation flow.

NEWZ | A Simplified News App

Flutter, NewsAPI

- Developed a streamlined news application with an intuitive user interface, integrating NewsAPI for real-time article retrieval and WebView technology for seamless in-app content display.

DairyBook | An App for Milk Sellers

Flutter, Hive

- Developed a Flutter-based dairy management application for rural communities that tracks daily milk sales, generates customizable period receipts, and operates offline using Hive local storage.
