Summary

Flutter Developer with a passion for clean code and great design. I build smooth, cross-platform apps using Flutter, Firebase, and REST APIs — always focused on performance, UX, and scalability.

Experience

Flutter Developer   October 24 – May 25
Acceltor Ltd   *Islington, UK*

Flutter Intern   June 24 – September 24
Bytewise Ltd   *Islamabad, Pakistan*

Skills

Programming Languages:	Dart, Python, JavaScript, HTML, CSS, C++, C#
Technologies:	Flutter, Firebase, Provider/Riverpod, SQLite, MySQL, Git/GitHub, FlutterFlow
Soft Skills:	Excellent communication, Strong Teamwork Abilities, Adaptability and Flexibility

Projects

Oval | Internal Communication Platform   *Flutter, Firebase Cloud Messaging*

- Developed a secure cross-platform communication tool for a Japanese client for employee collaboration using Flutter, featuring company-authorized login system and optimized internal messaging capabilities.
- Implemented Firebase Cloud Messaging for real-time push notifications delivering announcements, team updates, and critical information even when app runs in background.

RFK Mobile App | A Shoe Refreshing Service   *Flutter, PHP, MySQL REST APIs*

- Designed and developed the Refresh Kicks mobile app from concept to deployment, featuring a customer-facing application with integrated Stripe payment processing and real-time service updates.
- Built a complementary admin application that empowered business owners with comprehensive order management, user administration, service configuration, and business analytics capabilities.

Cricklyzer | A Cricket Enthusiast App   *Flutter, REST APIs*

- Developed a manual ball speed measuring feature that enables users to determine ball velocity by inputting release point, impact point, and pitch dimensions, achieving 90% accuracy with proper parameter selection.
- Enhanced user experience by integrating live cricket scores and news APIs while implementing Firebase and local storage solutions for secure, personalized data management.

MyPlace | Personal Location Bookmarking App   *Flutter, Google Maps API, SQLite*

- Built a Flutter-based mobile app that lets users bookmark and manage favorite locations with Google Maps integration.
- Implemented real-time location tracking, map previews, and location search, with persistent offline access using SQLite.

Chattr | Real-time Messaging Application   *Flutter, Firebase*

- Built a cross-platform chat application enabling users to communicate in real-time using Firebase Cloud Firestore and Firebase Authentication.
- Integrated Firebase Cloud Messaging for push notifications to alert users of new messages even when the app is in the background.
- Implemented user authentication, chat screen, message input handling, and real-time message syncing for seamless conversation flow.

DairyBook | Milk Sales Management App   *Flutter, Hive*

- Designed and developed a Flutter-based mobile application tailored for rural dairy vendors to efficiently manage daily milk sales and customer records.
- Implemented offline-first architecture using Hive for local data storage, enabling seamless usage in low-connectivity areas.

Education

Air University   Islamabad, Pakistan
Bachelor of Computer Science

Certifications

- Flutter and Dart - The Complete Guide : Udemy
- Version Control: Meta
- Career Essentials in Generative AI by Microsoft and LinkedIn
